

# **ACTION TOY PROPOSAL (Due: End of Lab9b, BrightSpace Group Submission)**

The report should be brief and should discuss the following:

- **Team number and team members**

For each of your two submitted toy ideas (your primary choice and a backup idea ):

- **Toy/project name**
- **Summary of toy idea** (describe main functions/features and actions it performs) and background story
- **Toy concept**
  - Description and sketches for the main functions the toy, including the sketches of the mechanisms to be used for each non-trivial coordinated motion (can be free-hand sketches or initial CAD drawings)
  - Include any relevant concept generation and selection process explanations/descriptions
- **BOM**
  - Generate a rough Bill of Materials (BOM) for your primary idea to gather plans on fabrication, assembly, and purchasing.

# DELIVERABLES

## - **Proposal Report**

- There is not a page limit or requirement (3-4 pages is recommended). As long as you paint a clear picture, there is not a need to embellish just to make the submission longer.
- 1 submission per team. Submit your file as a PDF with the following naming convention: Team##\_S26\_proposal.pdf

### **Project Requirements & Constraints**

- 1. Function:** novel mechanical or mechatronic toy with two non-trivial actions
- 2. Size limit:** 10x10x10 inches
- 3. Budget:** \$70
